SUMMARY

AI/ML engineer focused on **Generative AI, RAG, and Agentic Systems** – builds multi-agent orchestration (LangGraph), retrieval pipelines (hybrid search, reranking), and ships them through FastAPI. Comfortable with ambiguity and end-to-end system design. Currently building AI products at an internship, alongside agentic finance and multi-modal perception projects.

SKILLS

- **GenAI & Agentic Systems** : Multi-Agent Orchestration, Agentic AI, RAG (Retrieval-Augmented Generation), Prompt Engineering, LLMs, Tool-Augmented LLMs, Function Calling
- **Frameworks & Libraries** : LangChain, LangGraph, PyTorch, TensorFlow, Keras, Hugging Face, Scikit-learn, OpenCV
- **Embeddings & Retrieval** : Vector Databases, Similarity Search, Hybrid Search (BM25 + Vector), Reranking (BGE)
- **Backend & Deployment** : FastAPI, Flask, Streamlit, Docker, MLflow, AWS
- **Databases & Vector Stores** : Qdrant, FAISS, Pinecone, MySQL, SQLite
- **Programming & Fundamentals** : Python, Data Structures & Algorithms, Object-Oriented Programming, Git & GitHub
- **Data & Visualization** : Pandas, NumPy, EDA, Feature Engineering, Matplotlib, Seaborn, Plotly, Power BI

EXPERIENCE

IT Intern

Jun 2026 - Present

IKCON Digital IT Services Pvt Ltd

Cortex – AI Chatbot for Unified Management Suite (UMS)

- Designed and developed Cortex, an AI chatbot for the company's product Unified Management Suite (UMS), from early-stage architecture through implementation.
- Built a RAG system for querying meeting notes, tasks, and risks – BM25 + Qdrant vector search with RRF fusion and BGE reranking, feeding a locally hosted Qwen3-8B model for cited answers.

SurakshaGrid – Government Emergency-Response Platform

- Built an AI prediction pipeline using FastAPI and Google Gemini with structured JSON outputs and safety-rule validation; trained an XGBoost model on weather/traffic data (~621-point grid), achieving $CV R^2 \approx 0.52$, and eliminated data-quality artifacts skewing feature importance.
- Built a function-calling LLM chatbot (Ollama qwen2.5:7b-instruct) for natural-language incident queries against structured SQL data; integrated TomTom and OpenWeatherMap APIs with caching to manage rate limits.

Artificial Intelligence Intern

Jan 2025 - Mar 2025

Placemantra

- Cleaned and prepped text data for NLP models – feature engineering, EDA, the usual grind.
- Trained and tuned a few PyTorch/TensorFlow models, pushed accuracy up by about 12%.
- Set up MLflow so experiments were actually reproducible instead of scattered notebooks.

PROJECTS

FinPilot – Multi-Agent Autonomous Finance System

FastAPI, Next.js, Python, SQLite, LangGraph, JWT, LLMs, Agents

- Designed a multi-agent orchestration graph in LangGraph – specialized agent nodes for profiling, scenario simulation, and decision persistence – so planning and investment decisions are handled by coordinated agents instead of one monolithic model.
- Built the frontend in Next.js (auth, onboarding, dashboards, run replay, investment tracking); secured with JWT + optional Google OAuth for real-time monitoring.
- Live at finpilot-two.vercel.app

PROACT-SAFE – Real-Time Firearm Threat Monitoring

Python 3.11, YOLOv8, OpenCV, React

- Firearm detection system on YOLOv8 with temporal filtering across 5+ frames and weighted scoring to reduce false alerts; built a React dashboard for live monitoring, benchmarked with precision/recall.
- Code: github.com/kiran1627/PROACT-SAFE

AI-Powered Blood Donation & Matching System

Python, FastAPI, React.js, Scikit-learn, Blockchain

- Platform connecting donors, recipients, and hospitals via geolocation-based matching, a Random Forest compatibility model, and blockchain-backed donation records.

ACHIEVEMENTS

- Finalist – TASK Code Unnati Innovation Marathon (SAP & Edunet, 2025)
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional & Certified Data Science Professional
- Certified in Emerging Technologies – SAP & Edunet (2025)

EDUCATION

Jawaharlal Nehru Technological University Hyderabad (JNTUH)

Nov 2022 - May 2026

B.Tech in Computer Science & Engineering (AI & ML), CGPA: 7.76
